

CITY OF HUDSON

TREE PLANTING GUIDELINES

These city guidelines must be followed before you purchase or plant a tree in the city boulevard.

Diggers Hotline must be call at least 72 hours prior to digging any holes, 1-800-242-8511.

DISTANCES FROM:

Water and fire hydrants
10-15'

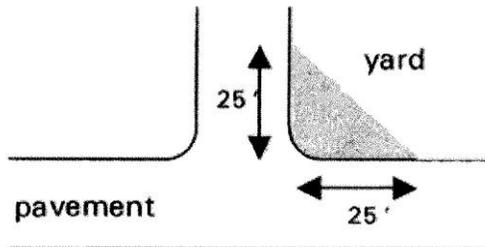

Gas
5-10'

Street lights
20-25', depending on size of street light

Street Rights of Way (boulevard/terrace area) Planting trees within the Street Right of Ways is permitted with approval from the Urban Forestry/Public Works Department. Approval will be based on boulevard width, utilities, intersections, street signs, intersection sight lines, previous tree locations, water mains/fire hydrants and street lights. Approval for tree selection will be based on the trees mature height, diameter and canopy size.

Corner

Nothing over 2.5' high is allowed to obstruct views within 25' of the corner of the pavement (for sightline/safety).

Stop signs
25', but do not block; may offset from sign

Overhead wires
There are specific criteria. Ask Xcel Energy or check their website for guidelines.

Previous trees
Minimum of 5' from previous tree stump

Property lines
Be sure to give the tree room so that its mature canopy will be on your property. Do not restrict a neighbor's free use of their yard.
