Grandview Drive Street Improvements Project Weekly Project Update

June 30, 2017

The City of Hudson is currently reconstructing Grandview Drive from Vine Street to Laurel Avenue. The duration of the project is June 21, 2017 to the substantial completion date of August 18, 2017. Construction includes removals, minor storm sewer, complete curb replacement, pedestrian ramps, bituminous surfacing and restoration.

Work Completed for the Week of June 26th

Monarch Paving has milled off the existing top layer of pavement and pulverized the north and south end of the project. They started curb, trail and pavement removals on Wednesday to prepare for the new curb and gutter to be placed next week.

Work Scheduled for the Week of July 3rd

Monarch Paving is planning on finishing the removals from Wednesday to either Thursday or Friday. The new curb and gutter is scheduled to begin placement on Wednesday at Laurel Ave on the West side of the street. Concrete work should last several weeks. See the parking section below for access details.

Traffic Impacts

Grandview Drive is closed off to all through traffic. The detour will last throughout the duration of the project. All access to homes on or directly off of Grandview Drive (Hunter Hill Court, Stonepine Avenue, Stonepine Bay and Stonepine Court) will need to be through Hunter Hill Road.

Parking

For public safety and project efficiency, no parking will be allowed on Grandview Drive. When the curb gets poured in front of the driveways it will take 5 to 7 days for the concrete to cure before it can be driven over. Please park on the side streets during this period. Residents may park in their driveways or on side streets for a majority of the project after the curb is cured.

Other Notes

If you have any additional questions or concerns please contact the project hotline at (715) 410-8161.
