# Hanley Road Street Improvements Project Weekly Project Update

**May 18, 2018**

**The City of Hudson is currently reconstructing Hanley Road from Carmichael Road to State Highway 35. The duration of the project is May 2, 2018 to the substantial completion date of June 27, 2018. Construction includes removals, minor storm sewer, curb replacement, pedestrian ramps, bituminous surfacing, turn lane additions and restoration.**

## **Work Completed for the Week of May 14**

Monarch Paving finished removing all curb and gutter, pedestrian ramps and asphalt from Hanley Road early in the week. They also finished all of the mainline curb and gutter installation and started paving the two foot asphalt patch back in between the new curb and the asphalt. Along with these improvements, Monarch Paving finished the storm sewer and watermain improvements.

## **Work Scheduled for the Week of May 21**

Monarch Paving is planning on finishing the asphalt patching and work on building the right turn lanes on eastbound Hanley Road to O'Neil Road and Rock Street. Excavation will begin early in the week, followed by base construction and the curb and cross gutter installation. During this time, Rock Street and East Canyon Road will be closed for several days. A start date will be sent out in a separate update at least 24 hours prior to closure.

## **Traffic Impacts**

Hanley Road is anticipated to be narrowed to one lane each direction throughout the duration of the project. The outside lanes will be blocked off for most of the project but there are times that traffic will be shifted to the outside lanes when working on the medians. All access to homes and businesses off of Hanley Road will still be available. Some intersections may need to be closed for periods of time but one access north and one access south will be available at all times. Delays are expected through Hanley Road during the project so other routes (Stageline Road) may be a better route for some residents.

## **Other Notes**

If you have any additional questions or concerns please contact the project hotline at (715) 245-7188.
