Hanley Road Street Improvements Project Weekly Project Update

June 29, 2018

The City of Hudson is currently reconstructing Hanley Road from Carmichael Road to State Highway 35. The duration of the project is May 2, 2018 to the substantial completion date of July 27, 2018. Construction includes removals, minor storm sewer, curb replacement, pedestrian ramps, bituminous surfacing, turn lane additions and restoration.

Work Completed for the Week of June 25

Monarch Paving installed several pedestrian ramps and began the soil preparation for seeding and mulching. The street lighting was also all completed and all of the lights are now on along Hanley Road.

Work Scheduled for the Week of July 2

Monarch Paving is planning on finishing the restoration along the new curb. Monarch is also planning on removing the pavement for the medians and follow in with the new curb and concrete median. By the end of the week it is anticipated to patch in front of the new median curb to prepare for milling.

Traffic Impacts

On Monday afternoon or Tuesday morning, Monarch plans on shifting traffic to allow work on the medians. This will involve diverting traffic to the outside lanes while the removals and concrete work occurs.

Hanley Road is anticipated to be narrowed to one lane each direction throughout the duration of the project. The outside lanes will be blocked off for most of the project but there are times that traffic will be shifted to the outside lanes when working on the medians. All access to homes and businesses off of Hanley Road will still be available. Some intersections may need to be closed for periods of time but one access north and one access south will be available at all times. Delays are expected through Hanley Road during the project so other routes (Stageline Road) may be a better route for some residents.

Other Notes

Any irrigation lines that need repairs should be made next week to minimize restoration corrections.

If you have any additional questions or concerns please contact the project hotline at (715) 245-7188.
